

May be the most advanced car transporter on the market

This is why the Brenderup series 6000 is the most advanced car transporter on the market:

- Large platform. Lengths of 420-520 cm provide space for all cars.
- Ideal loading angle, also for low cars.
- The open platform makes it easy to get in and out of the car. Also low cars!
- 13" compact wheels ensure fine towing characteristics.
- Heavy duty jockey wheel.
- Coupling with cylinder lock (trailers with a total weight of 3,5 ton).
- Heavy electric winch (accessory).
- Battery box.
- Infinitely variable, easily adjustable wheel chocks (accessory).
- Loading skids
- Large tool box for mounting under the platform of the trailer (accessory).

Lockable suspension

When not used, the loading skids are pushed under the floor. The loading skids are locked inside the suspension.

Loading skids

Recommended, especially for car transportation.

Driving abilities, Safety and Quality

• **Low loading height**

The wheels of the Brenderup car transporters are positioned to the outside of the trailer, alternatively they have compact wheels under the platform. This provides one of the lowest loading heights in the market, and in addition the low centre of gravity provides optimum driving abilities.

• **Maximum driving abilities**

A Brenderup is equipped with a V-shaped drawbar which, together with the rigid chassis, independent wheel suspension with rubber torsion axles, quality tyres, and rims largely prevents swaying.

• **Reliable spare part supply**

Thule Trailers A/S offers comprehensive spare part documentation for our trailers. Contact your Brenderup dealer who will always be happy to help you with advice, guidance and servicing.

• **Long life**

All individual chassis components are galvanized for maximum protection against rust.

Superior driving characteristics

The Brenderup - Car Transporters and Multitransporters

- The Brenderup Car transporter range, models 'GT' are standard supplied with manual winch, jockey wheel and single acting hydraulic cylinder.
- Trailers with the wheels outside. Very low loading height and centre of gravity.
- The Multitransporter is very well suited for transport of cars. It is equipped with loading skids, winch and prop stands are accessories.
- The Multitransporter can be equipped with high cover and full width floor (accessories).

Safe loading

The loading skids are produced with upward facing, offset oval openings. In addition the openings act as lashing holes.

Running-board mudguards

The mudguards are strongly built, and can be used as running boards.

Winch and cable

In standard execution, the trailer is equipped with winch and cable.

Tilt system

Easy loading and unloading of cars.

Quality axles

The rubber torsion axles with independent wheel suspension as well as car type wheels all contribute to ensuring outstanding road holding.

Durability and stability

The hot-galvanised chassis gives the Brenderup car transporter outstanding strength and stability on the road.

Clear marking

Lamps and reflectors are mounted on the side of the trailer.

Full width floor

If a larger loading surface is needed, the trailer can be fitted with an aluminium platform. (Accessories)

Large platform dimensions - perfect for all cars

A variety of useful standard equipment

As standard the 6000 series car transporter is supplied with:

- Loading skids with suspension
- Winch post
- Spare wheel with holder
- Battery box
- Running rails
- Single-acting hydraulic cylinder
- Manual winch

Ideal for all types of cars

The large platform of the 6000 series is very well suited for low cars. It is easy to open the door. The large inside width of 205 cm makes it ideal also for wide cars. In addition, the length of the platform of 420 and 520 cm, respectively, makes it well suited for long cars, vans, etc.

Protection against theft

The strong coupling with cylinder lock, by which it is possible to lock the trailer on to the coupling hook, provides maximum protection against theft. Only trailers with 3.5 tonnes total weight.

Wheel stop (accessory)

Infinitely adjustable wheel stop, adjustable over the entire length and width of the trailer. (Available for the 6000 series on trailers with rails).

The series 6000 is equipped with 13" compact wheels which ensure a low loading height, a fine ramp angle, and very fine driving abilities.

- shown with manual winch and wheel stop.
