

Brenderup

**NEW - Double Alu
rail Extension Kit**

Brenderup - Strong and durable trailers at competitive prices with 13" wheels

Easy lashing of covers

Tarpaulin buttons are mounted all the way around the trailer and are standard.

Strong gatelocks and catches

Take hold with both hands and test their strength and quality.

Protected lights

Lights in a protected position under the tailgate.

Easy storage

Brenderup 1150 and 1205 can stand on their ends.

Secure lashing of contents

4 internal lashing eyes on model 1150 and 6 on model 1205 ensure easy securing of the load.

Maximum driving stability

V-shaped security drawbar goes all the way under the deck, thus increasing stability and giving a smoother and safer ride. Articulated connection to deck to reduce vibrations and ensure durability.

ABS Lid

New lockable ABS lid giving extra space. (Accessory)

Strong design

Continuous longitudinal members provide a strong construction. Strong axles on both sizes: 750 kg axles on model 1205 and 600 kg axles on model 1150.

Maintenance-free mudguards

Weather-resistant, rounded plastic guards.

*Model 1150 S (R 13")
with ABS lid and jockey wheel.*

Accessories

Flat cover

Keeps your load dry during transport.

Aluminium/wooden hardtop

Attractive solution in wood with aluminium edging. Lockable.

Extension sides

Indispensable if there is a lot to move.

High cover

The high cover greatly increases the usefulness of your trailer by more than doubling cargo volume.

Mesh sides

Mesh sides - indispensable for transporting leaves or garden refuse.

Bike carrier

Extremely stable and easy to mount on the side of the trailer. Room for 3-4 bikes.

Sides	Steel	
Total weight	750	kg
Working load	610	kg
Int. length	204	cm
Int. width	116	cm
Wheels	R 13"	

1205 P Technical data

Sides	Wood	
Total weight	750	kg
Working load	600	kg
Int. length	207	cm
Int. width	119	cm
Wheels	R 13"	

NEW!

Double Alu-rail Extension Kit

Brenderup has developed a new economic double alu-rail extension kit, consisting of two sides-frames. These double rails increase the sideheight with 45cm, and thereby offers a significant increase in the inside box-volume of the trailer.

It's very lightweight due to the utilization of aluminium sidebars, which both makes the handling very easy, secondly maintains most of the initial payload of the trailers.

Model 1205 S with double alu-rail extension kit. Small photo: Cover for alu-rail extension kit.

Which Brenderup shall I choose?

• Car type wheels and tyres

Many trailers have centre disk wheels which practically are identical with garden barrow wheels. The wheels on a Brenderup trailer, however, have pressed rims fitted with radialply tyres on all trailers with 13" wheels - exactly the same as on cars. Also this detail allows an increased strength as well as improved towing characteristics.

The axles have rubber torque shafts with independent wheel suspension (as on modern cars). No leafsprings on a Brenderup! Brenderup's wheel suspension and spring system is maintenance-free and has an extremely long useful life.

• You'll never notice you've got a Brenderup behind

Independent wheel suspension ensures stable road holding. Brenderup trailers have axles from one of Europe's leading suppliers.

• No weaving with a Brenderup
The V-shaped towbar, the stiff chassis, the independent wheel suspension, the wheel rims and tyres - together they constitute your best guarantee against weaving. If the trailer is loaded with the correct nose weight, you are sure of the best possible handling and enjoyment.
